SUMMARY

Full Stack Web Developer with 5+ years of experience designing and implementing websites and web-based based software solutions.

RECENT EXPERIENCE

Standup Wireless

Application Developer

March 2024 - June 2025

- Core contributor to 3 enterprise Laravel applications serving PWG Network Solutions.
- Analyzed API usage data and designed an interactive dashboard featuring real-time charts processing 500k weekly requests requests, enabling the identification of key performance metrics that led to 60% decreased API debugging time.
- Led a strategic project to internalize API dependencies using PHP, Laravel, React, Livewire, Typescript and Filament, resulting in a significant 60% cost reduction for vendor services, demonstrating expertise in leading cost-saving initiatives, implementing efficient solutions, and driving business value.
- Implemented React.js to develop a dynamic front-end interface for a client-facing application and leveraging JavaScript's flexibility to streamline updates across multiple channels.

Atrillix

Full Stack Developer

January 2024 - June 2025

Digital Marketing Agency

- Spearheaded the development and deployment of scalable web applications, enhancing client online platforms and contributing to \$135k in new business sales.
- Implemented comprehensive site optimizations including metadata improvements and page speed enhancements, resulting in a 45% increase in organic traffic over 6 months.
- Managed end-to-end development lifecycle for 5+ concurrent client projects, achieving 100% client satisfaction rate.

Atlantic Training

Software Developer

February 2022 - January 2024

- Implemented a document management feature within the LMS using Node.js and jQuery, enabling retrieval and download of PowerPoint, PDF, and image files.
- Engineered a dynamic reporting dashboard utilizing PHP, Chart.js, React, and MySQL to provide management with real-time insights into employee training performances improving client retention efforts.
- Upgraded system from PHP 5.4 to 8.0 and refactored Atlantic LMS using Xdebug, phan, and PHPStorm.
- Migrated legacy PHP system to Laravel architecture, resulting in reduced deployment time and around 70% decrease in system-wide bugs.
- Orchestrated a strategic redesign of the company website that included implementing SEO best practices that led to a 50% rise in organic traffic.

Global Talent Link

Web Developer

Remote

January 2020 - January 2022

- Led development and maintenance of company website, delivering 99.9% uptime while managing 30+ client-requested updates per quarter.
- Collaborated with 4-person marketing team to execute a major website redesign, resulting in 25% increase in user engagement and 40% reduction in bounce rate.
- Authored comprehensive technical documentation suite covering core business processes, reducing onboarding boarding time for new employees by 50%.
- Engineered critical features including user authentication system supporting, automated chat bot handling daily inquiries, and lead-generation forms that increased conversion rate by 30%.

PROJECTS

Founder & Lead Full Stack Developer

TCG Architect • tcgarchitect.com

June 2024 - August 2025

- Architected and developed a full-stack trading card game deck building and tool platform using Next.js (React/Typescript) front-end and Laravel (PHP) back-end with PostgreSQL database.
- Integrated external APIs to fetch and synchronize 1,800+ card with details, tournament results, pricing data, and player statistics from multiple TCG data sources.
- Built comprehensive deck builder with advanced filtering, card search, visual/list views, and drag-and-drop functionality for optimal user experience.
- Implemented secure user authentication system with role-based access control, admin panel using Filament, and protected API endpoints.

EDUCATION

A.S. Business Administration

SUNY Ulster

2020
